67

There seems to have been some confusion regarding the disposal information for the 06/28/2021 pickup which was made at the USEPA Shiloh Church Road Facility. All material has been disposed of. Attached please find Invoice 21446 which covers this pickup. I have also attached the Disposal Certificate for the Source drum that went to Waste Control Specialists in Andrew Texas and well as the Disposal Certificate for the remaining items that went to Energy Solutions in Oak Ridge, TN.

I apologize for all the confusion. Please feel free to reach out: [Nonresponsive based on revised scope] who is copied on this email for further clarification, questions and or comments. Thank you.

It's going to the CWF in Andrews: 9998 West State Hwy 176 Andrews, TX 79714

All of their licenses and permits are located on this page: <https://www.wcstexas.com/customer/licenses-permits/>

[Redacted]

I looked into this a little further with our QA Manager and found that while we originally thought of sending the Radium to DSSI, it is actually in a source drum right now and will be shipped to the Texas Compact Disposal Site, to be buried at the end of this month. So I will be sending you a disposal certificate in early April.

Best,

[Redacted]

Hi [Redacted]

I am waiting for DSSI to get back to me with a Certificate, but I should have it for you very soon.

Best,

Checking to see if any update on the disposal of the Radium 226

Thanks

Here is the COD from WCS – I redacted the page on which your info is listed because the Cs137 sources went into a big drum full of other generators' sources, and they are listed above and below US EPA Shiloh.

The Ra226 went to DSSI, and we just picked it up on the 13 of January so it hasn't been disposed of yet.

Is it possible to get a COD from Waste Control Specialist that is on their letterhead?
Also, this COD is for the Cesium 137 disposal. What is the status of the Radium 226 disposal?
